About WuduWash

Specialists in Modern Ablution Solutions

WuduWash is a leading specialist in the design and supply of innovative Wudu and ablution solutions for commercial, institutional, religious and residential environments.

Our mission is simple: to improve the way Wudu facilities are designed, specified and experienced by combining functionality, hygiene, accessibility and contemporary design. From individual Wudu basins and integrated ablution stations to stainless steel foot wash troughs, anti-ligature solutions and specialist accessories, our expanding product portfolio has been developed to meet the requirements of both modern architecture and traditional ablution practices.

WuduWash products are suitable for a wide variety of environments, including mosques, Islamic centres, airports, universities, schools, hospitals, healthcare facilities, prisons, offices, shopping centres, hotels, leisure facilities, multi-faith prayer rooms and residential developments.

Designed for Modern Environments

We understand that an effective Wudu facility must provide more than simply access to water. It must consider user comfort, water containment, hygiene, accessibility, durability, maintenance and the overall appearance of the space.

Our products are therefore developed with both the end user and the project team in mind. By working with architects, consultants, contractors, developers and facilities professionals, WuduWash helps integrate practical ablution facilities into projects from the earliest specification stages through to installation.

Supporting Projects Worldwide

Headquartered in the United Kingdom, WuduWash supports customers, partners and projects across a growing international market.

To strengthen our presence in the Middle East, WuduWash also has an office in the United Arab Emirates, supported by regional warehousing and distribution capabilities. This strategically positions us to provide efficient commercial, logistical and project support to customers throughout the GCC region, including the UAE, Saudi Arabia, Kuwait, Qatar, Bahrain and Oman.

Our regional presence enables us to work closely with architects, consultants, contractors, developers, distributors and procurement teams throughout the GCC, providing responsive support for projects from initial specification and product selection through to procurement and supply.

Whether the requirement is for a single unit, a large commercial installation or a bespoke project solution, our team can provide product guidance, technical information and commercial support throughout the procurement process.

As our product range and international presence continue to grow, our focus remains unchanged: to provide high-quality, purpose-designed ablution solutions that improve the Wudu experience while complementing the buildings and environments in which they are installed.

WuduWash

Modern Ablution. Thoughtfully Designed.

Our Services

Specialists in Modern Ablution Solutions

WuduWash supports architects, consultants, contractors, developers, procurement teams and facilities managers with the specification, supply and installation of modern Wudu and ablution facilities.

Our services include:

Product Specification & Technical Support

We help project teams select the most suitable products based on space, usage, accessibility, materials and installation requirements. Support can include, product specifications and technical information, technical drawings and dimensions, plumbing and drainage guidance, Installation guidance and product selection assistance

Commercial Project Supply

We provide project-specific quotations for developments of all sizes, including mosques, Islamic centres, airports, universities, hospitals, secure facilities, commercial buildings and multi-faith prayer spaces.

Our team can assist with quantities, product selection, delivery schedules and international supply arrangements.

Professional Installation

WuduWash can provide installation services for selected products and commercial ablution facilities. We work with main contractors, MEP contractors and site teams to coordinate installation and help ensure products are fitted correctly and in accordance with the relevant specifications.

Installation services may include, wudu basin and ablution unit installation, positioning and secure fixing, plumbing and drainage connections, where agreed, multi-unit facility installation and site coordination and technical support

Bespoke Solutions

Where standard products do not meet a project's requirements, we can discuss bespoke solutions, including customised dimensions, configurations, materials and stainless steel foot wash troughs.

Specialist Solutions

Our product range includes anti-ligature solutions for secure environments and accessible options designed to support wheelchair users, elderly users, children and individuals with reduced mobility.

International Supply & Distribution

WuduWash supports projects throughout the UK, GCC and international markets. We can assist with commercial quotations, documentation, freight coordination and delivery arrangements.

After-Sales Support

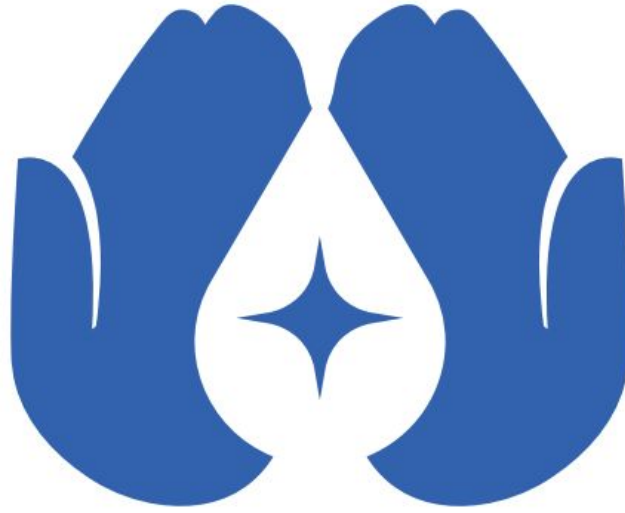

We provide ongoing technical and product support before, during and after installation. WuduWash products are supplied with a 12-month manufacturer's warranty against manufacturing defects, subject to the applicable warranty terms.

From initial specification to final installation, WuduWash provides reliable, purpose-designed ablution solutions for projects of every scale.
